**Campus Closure**

A. The College has a responsibility to the students and to the public to provide the services and facilities for which they have contracted. With this responsibility in mind, the College and its employees will make every reasonable effort to be open and available to provide its services and facilities.

B. During inclement weather, the College is to remain in operation except when one of the following conditions occurs:

   1. A state of emergency is declared or the State Police or Sheriff’s Office recommends closing the College.
   2. A majority of the primary county roads are closed or extremely hazardous driving conditions exist.
   3. Campus roads, walkways, or parking areas cannot be kept sufficiently cleared.

   In addition, the closing of other public institutions in the College district may be used as a determining factor in campus closure, the cancellation of classes, or a delayed start.

C. The President will be responsible for the development and publication of any procedures necessary to administer this policy effectively.
